Project Title:

Time logs 2/8/2024 to 2/16/2024

12 hours accumulated in this period

Date	Duration	Type	Description of completed work	Challenges and/or Next steps
2/8/24	1 hour	Other	Checked blackboard to see if I got any responses and sent out more emails.	
2/11/24	1.5 hour	Other	Decided to do some more research on a project idea on my own while waiting for responses	Figuring out a plan B
2/12/24	1 hours	Research	Wanted to work within machine learning and wrote out a few ideas I had in mind	Narrowing down what I can do on my own
2/13/24	4 hours	Documentation	Did research on AI, and open data on google colab to be tested on Jupyter notebook, so I can get used to the idea of working with machine learning.	
2/14/24	1.5 hours	Other	Reached out to an old mentor of mine asking to help guide me within the scope of data science and help guide me on what the best route to take with my project idea.	
2/15/23	2 hours	Coding	Familiarized myself with python and machine learning using Jupyter notebook.	Working with Jupyter notebook after a while.
2/16/24	1 hours	Other	Waiting to hear back from my mentor. In the meantime, figuring out a schedule on how to approach a machine learning project on my own.	

Reflection*What were your main goals in this time period?*

Continuing to find a group. Also, if not, what would be the best project for me to work on by myself.

What were the main challenges during this phase? Were you able to meet the challenge, if so, what helped? If not, what could help?

Delving into machine learning as a beginner and navigating the ins and outs of it. What helped me was the idea of reaching out to my mentor who is knowledgeable within this field and listening to the insight she will provide me with.
