 Project Title: Study Schdeule Calculator

Time logs 2/25/2024 to 3/3/2024

16 hours accumulated in this period

Date	Duration	Type	Description of completed work	Challenges and/or Next steps
2/25/24	2 hours	Other	Continued learning until my meeting with the professor	
2/26/24	4.5 hours	Other	Met with Professor Chuang. Formed a group and discussed the project idea she has for us and how each of us can contribute. As a new group, we spent time in the library going over our plan for the project and how implementation will look.	Working on a new project with a team
2/27/24	2 hours	Research	Trying to focus on our idea and making sure I understand what needs to go into it.	Narrowing down what I can contribute and what are my skills
2/28/24	2 hours		Our idea was pitched with the help of the professor: Study schedule calculator and that our goal for the week was to work on a simple prototype. Scheduled to meet for next week.	Communication with group members and figuring out our calendars.
2/29/24	1 hours	Other	Planned to have a virtual meeting to go over everything.	

3/1/23	2.5 hours	Coding	Familiarized myself html, css code, and learned some javascript.	
3/3/24	2 hours	Other	Discussed what our goals are for today, if we should meet to go over our what we should begin working on and delegating tasks. Waiting to begin on anything concrete until the professor shows us on Monday what is needed of us.	

Reflection

What were your main goals in this time period?

Going over the project idea and figuring out everyones strengths and weaknesses so we can delegate tasks properly to each team member.

What were the main challenges during this phase? Were you able to meet the challenge, if so, what helped? If not, what could help?

Communication and timing everyones schedule properly since we were a new group in middle of the semester. Once we scheduled meeting with the professor and spending time in the library, our goals became more concrete making it easier to communicate and present our individual goals.
